

Chinese university makes Wi-Fi seekers solve equation for password

Sometimes getting on Wi-Fi can be a problem. But for students at an East China university, it literally is.

The cafeteria at Nanjing University of Aeronautics and Astronautics (NUAA) is giving internet access to those who can decode a complex calculus equation for the password, according to Global Times.

numbered musical notation. "The students from NUAA are all super nerds. They love new things. It must be fun for them," said a NUAA teacher.

The school's catering management said the two different problems cater to the expertizes of different majors.

"We chose a music notation problem for the Xinyuan Library Restaurant because it has more liberal arts students," said an employee surnamed Ji.

"We chose a math problem for the other cafeteria because it has more engineering students. Many of them have already worked it out," Ji added.

For those that can't hack it, Ji said the answer is as easy as Pi.

and thousands of academic losers are saved," wrote 'niuniu' on chouti.com.

The hurdles don't stop there.

In NAUU's Xinyuan Library Restaurant, a musical riddle challenges students to convert a written eight-note melody to

Video showing the differential equation has since gone viral, leaving many on social media stumped.

"Dumb as I am, I may as well use my mobile data," wrote Sina Weibo user 'sunzhenan'.

"I would rather starve," wrote 'babazai'.

"One super nerd gets it right,

Shanghai university enrolls another goose, and she loves hot baths

Following the enrollment of the handsome Gugu, another goose has recently been admitted to Shanghai Maritime University, and this time it's a girl, Xinhua news agency reported.

The goose, Yuanbao, can climb stairs and loves hot baths, according to her former owner Cai Qingqing, ECNS wrote.

Cai, who lives in Baoshan District, has raised Yuanbao for one and a half years. But her family can't take care of her anymore because Cai is pregnant.

When Cai saw the news that Shanghai Maritime University had enrolled Internet celebrity goose Gugu, she soon asked whether the school could take in her goose as well.

After the university agreed to keep the bird, Cai took her feathered friend to school on September

9, joining the big family of geese on campus.

A total of 20 geese are now being raised by the university, becoming an attraction in themselves.

Cai said she will come to see Yuanbao often in the future.

Chinese netizens cheered the news of Yuanbao and her new home, with someone joking, "Great — Gugu has a beautiful girlfriend now!"

Gugu was the first goose officially admitted to

Shanghai Maritime University, which was already raising some geese on campus. His former owner asked the school to adopt him as the family had to move away.

Gugu was taken to the university by his former owner on September 7, and has since become an official freshman of the school.

Seagull browses the aisles at skateboard shop

Published by wordpress.com

A worker at a store in Australia captured video of an unusual customer browsing the aisles — a seagull.

The video, filmed on Tuesday at a skateboard store in Melbourne, Victoria, showed the seagull wandering aisles of shoes and clothing at the shop, UPI reported.

The seagull speeds up its steps as the employee approaches and eventually darts toward the door.

"I work in a skateboard store near a beach and a seagull decided to wander into the store first thing in the morning," the filmer wrote.

PICKED PIC

ANDREA PAPALIA/NATIONAL GEOGRAPHIC

An impala gets a drink of a water near Francistown, Botswana, creating a wonderfully geometric scene. "The symmetry in this frame is spot on with the impala in the center but then paired with random sets of legs in the background. The light falling on its horns and hide highlight the different textures of the animal," remarked Your Shot photo editor Kristen McNicholas. "Nicely done!"

Sudoku

Sudoku was inspired by the table devised by Iranian mathematician Khwarazmi. Fill 9x9 grid with digits so that each column, each row and each of the nine 3x3 sub-grids that compose the grid, contains all of the digits from 1 to 9.

5	7		3				4	
				5				
		6						8
	8		1				9	3
6								4
4	7			6	1			
7							2	
			3					
	8			4			1	6

9	1	5	4	6	7	2	8	3
7	8	4	1	3	2	5	9	6
6	3	2	5	9	8	4	1	7
5	2	1	9	8	6	7	3	4
4	7	8	3	2	5	1	6	9
3	9	6	7	4	1	8	5	2
8	5	3	6	7	4	9	2	1
1	1	9	7	5	2	3	4	8
