Mazeroon Foam industrial group started its activity in the field of producing and distributing polymeric foams in 2004. Aiming to produce modern and economical products used in housing construction, packaging and isolation industries as well as disposable containers, the industrial group is producing polymer foams using modern equipment and machinery and cutting edge technologies.

The company is located in Savadkuh in the northern Iranian province of Mazandaran. It uses professional and experienced experts and has four production lines for producing:

1. Different types of disposable containers and packaging styrofoams
2. Different types of poly-ethylene foams
3. Different types of expandable polystyrene foam products
4. Different types of disposable containers

In addition, this industrial group has a significant presence in the markets of the abovementioned products and has put in a brilliant performance in producing and selling these goods as well as gaining customers' satisfaction. The group has received the following provincial, national and international certificates and honors:

- Iran's national 11108 standard (It is the first Iranian company to receive the standard)
- The honor to be the first colleague laboratory cooperating with Iran's Standard and Industrial Research Institute in the field of producing styrofoams
- ISO9001:2008 from from England's IEC and ISO14001:2004
- OHSAS 18001:2007 certificate
- Research and Development (R&D) certificate from the Iranian Ministry of Industry, Mine and Trade
- Honor of being selected Iran's top standard institute in 2010
- Honor of being selected Iran's top entrepreneur in domestic industrial sector in 2010
- Honor of being selected top domestic industrial unit in 2010, 2012, 2013, 2014, 2015 and 2016
- Honor of being selected Iran's top unit in R&D sector in 2013, 2014, 2015 and 2016
- The honor to be top supporter of

- consumers' rights in 2014
- Health permit for production from the Iranian Ministry of Health and Medical Education
- Honor of being selected top Iranian unit in respecting consumers' rights in 2014
- Producer of top R&D product – slow-burning polyethylene foams – of the province (Mazandaran, northern Iran) in 2015
- Honor of being selected top provincial employer in 2015
- Honor of being selected top industrial unit of Iran's district No. 2 in 2015, selected by the Iranian Ministry of Cooperatives, Labor and Social Welfare
- Producer of Mazandaran Province's top R&D product – absorbent styrene foam – in 2016
- Honor of being selected Iran's top R&D center in 2016
- Honor for designing Iran's top research, industrial and mining project in 2016
- Honor of being appointed the head of the board of directors of Mazandaran Province's employers association of Styrofoam producers
- Honor of being selected top provincial exporter in 2016

# Mazeroon Foam Mazandaran's pride in global markets

• Three certificates for patenting inventions in the field of produc-

ing absorbent polystyrene foam containers, biodegradable foam containers and slow-burning polyethylene foams

- Membership in Iran's Association of the Producers of Disposable Containers
- Colleague laboratory eligibility confirmation certificate

Among the other characteristics of this industrial group are its standard organizational order and having a comprehensive and complete goods distribution network across the country. The industrial group is also in constant trade contact with foreign traders and businessmen which enables it to export its products to Asian as well as neighboring states. It is Iran's first exporter of poly-ethylene foam products.

The company's products include expanded polystyrene (EPS) blocks

for building roofs in different sizes and with different densities, different kinds of 3D wall panels for building construction, refrigeration room and floor heating systems with different densities

and  
 Khodro Company, SAPCO, Iran Khodro Spare Parts and After-Sale Services Co. (ISACO), Kalleh Dairry, Mazinur, Navid System, Royal Khab Asayesh, Royal Aramesh, Tanasa Company, Narm Asa Company and PETCO, developmental and dam construction companies, road, bridge and overpass construction firms and building construction companies as well as associations such as the Islamic Revolution Housing Foundation, Mehr Housing, Supreme Audit Court's housing cooperatives and Iran Construction Engineering Organization. Implementation of Mazeroon Foam industrial group's projects are aimed at:

1. Boosting entrepreneurship and job creation
2. Stimulating economic growth and sustainable employment
3. Helping create a boom in Iran's economy using the world's modern technologies
4. Increasing the volume of its production to lead the market and take a greater share of it
5. Using modern technologies and international machinery to improve the quality of the products and satisfy customers

lengths

of up to six meters, different kinds of Styrofoam in different shapes used in road, dam, bridge and overpass construction, different kinds of poly-ethylene foams used for buildings' roofs and with industrial and sport uses, shock absorbing foams for kindergartens and nursing homes, different kinds of foam slabs and mattresses and disposable foam containers.

Among the companies using the industrial group's products are Iran
